

The TETRIS modular concept is conceived as a set of upholstered geometric units, where different seats, backrests, armrests and side tables can be combined to create an infinite array of forms that can be rearranged to optimize the space in each installation. The modular design of the TETRIS concept even allows the combination of different upholstery and colours in the same sofa. The TETRIS collection enables reception and rest areas to become productive areas promoting the interchange of ideas, informal meetings or simply to remain as a place to relax and unwind. The pure, gracious and timeless aesthetic appearance blends in well with all kinds of architecture.

DESIGNER: INCLASS Studio

The INCLASS design studio started its activity in 2005 with the aim of embedding and driving design in different areas of the company. Today the studio is made up of a cross-functional team which incorporates product designers, graphic designers, engineers and prototype technicians. Since then it has undertaken the overall design of numerous products and has developed the proposals of top external designers who usually work with our firm. The studio strives to ensure that INCLASS designs have a contemporary look, that at the same time are balanced, pure, elegant and timeless with a view to introducing collections that are always innovative, attractive and modern.

BODY

Wooden inner structure.

Foam: High resilience HR flexible polyurethane foam of various densities.

Upholstery: Available in any of the leathers or fabrics of the INCLASS swatch cards and also with fabrics supplied or specified by the customer.

LEGS

The legs are made of 18mm solid steel rod.
